

Focusing on your challenges, together.

Payback time: ~~4 years~~
Now 3 years!!

It's all about maximising return on investment; reducing the time it takes for your new machine to start making your business more profitable.

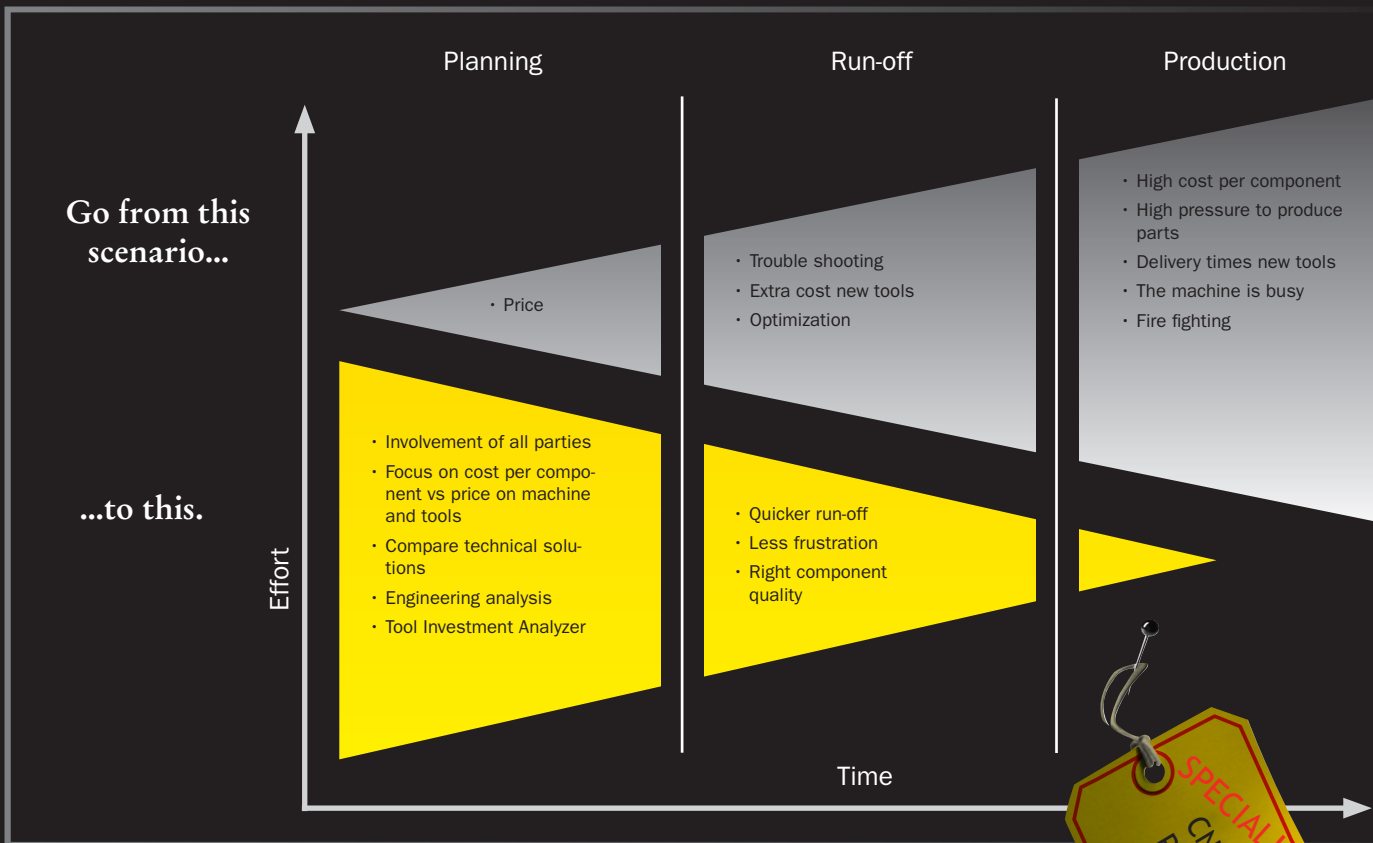

Solutions matched to your exact needs and objectives, getting you to where you want to be in the improved productivity picture. One of faster throughput, lower costs and productivity gains of 20%. Payback from day one!

We believe the key to this success lies in the earliest planning stage (often before the investment is made) and developing the best production process for your needs. It is in doing the groundwork that forms the base for your future profitability.

How do we do it?

By becoming a partner, not just another supplier; using the experience gained from helping thousands (and thousands) of small manufacturers make their improved productivity goals a reality.

From cutting-edge solutions to first class support. Right from the Start is your way of the future.

The next step...

We are ready to talk successful Machine Investments. Contact your local Sandvik Coromant representative.

Your success in focus.
